Welcome to Smith System.

We design and build furniture exclusively for learning environments. Every piece is optimized to account for how students work, learn, think and fidget across every age and stage. From the beginning, we work alongside you to create the best spaces imaginable for teaching and learning — school by school, classroom by classroom.

Experience

Designed to Deliver

Design + Innovation

We're at our best when we're collaborating with schools, design firms, architects and furniture dealers across the country. Doing that work every day — talking curriculum and taking notes on how students learn — is the only way we know. We have a history of working with external product design teams who are experts in their fields to bring our concepts and insights to life.

Performance

We often describe the way we work as 'on-time' because there's no other way to describe how we work. Frankly, we believe there is no other way to work. Our business is highly seasonal, and when classes start up, we make sure our furniture is ready to go. It's taken a lot of learning and diligence to get to where we are today. Our customers keep returning, happily, to remind us that 'on-time' is the only way to be.

Quality + Value

The demand on schools to provide creative and inspiring learning environments for today's students is high. We help schools and districts meet that demand with furniture that is built for making, exploring, studying and collaborating. We make furniture that is built for learning. This simple credo drives the way we design, manufacture, assemble and deliver our products, so that our customers can get high-quality furniture at a price every district can afford.

Designed for every age, and every stage.

Early adaption.

From the first day of pre-K, furniture must adapt to the needs of shifty little learners. We design early education environments that stand up to these demands to help children thrive.

Formative years.

Design doesn't happen in a vacuum. Every consideration is made to provide elementary students the support and flexibility they need for success.

Growth spurts.

Kids grow quickly but at different paces. Our furniture is designed to grow with the student, while accounting for variations in size and shape and meeting everyone's own unique needs.

Social status.

Middle school presents its own challenges, but durability and comfort should never be sacrificed. We create unique spaces that serve as the foundation for collaboration.

Head of the class.

By high school, it's imperative to break down the barriers to engagement. Our furniture is proven to empower the next generation of learners and leaders.

Before you begin:

Explore our space, first.

SmithSystem.com is your launch pad. We've carefully assembled an online library of information to help you hone your knowledge and stimulate your imagination. It's the natural result when we have really passionate people with over a century of experience to share.

Find insights and inspiration.

Guides: modern classrooms, commons and makerspaces

BIM Files: Revit, 2D/3D DWGs; we're also up on 20/20 and Project Matrix

Videos: graduate movement, STEM environments and Cascade storage

Blog: current education trends, best practices and customer case studies

Continuing Education: AIA course and presentation outlines

Social Media: photo updates and news on Pinterest, Instagram and Twitter

What we offer educators.

Innovative Design

Beautiful furniture designed to create comfortable, healthy and engaging learning environments.

Exceptional Customer Care

An attentive sales force, 24/7 support, and the best customer service in the industry.

Durable

Seating, desks, tables and storage units that stand up to decades of wear and tear from students (and their backpacks).

On-Time Shipping

Orders made fresh to your specs and shipped without delay — even during peak season.

Customization

An impressive palette of color options for laminate tops, edges, paint and chair shells. Boost school spirit, stay subdued, or go bold.

Modern Thinking

Product lines that connect students to modern curricula and current research on how kids learn best.

Value

A wise investment in quality furniture that has become the brand of choice for many of the largest school districts in the states and abroad.

Environmental Health

Our entire product portfolio is 100 percent certified to meet indoor air quality standards for children and schools through UL GREENGUARD.

Great Warranty

A limited 12-year warranty, with a lifetime frame warranty. Find out more at smithsystem.com/about-us/warranty.

That's what our customers love most.

New for 2023

What's your new favorite?

Education is always evolving and so are we. We're excited to share the next generation of Smith System products that will transform your classrooms and learning spaces.

New for 2023

Numbers™ Cantilever Chair

Numbers Cantilever Chair is a winning answer for creating inspirational classrooms around the world. The chair delivers impressive benefits that add up for students and schools – great value, quality and comfort in a compact, sleek design that appeals to a range of ages. To optimize learning, the chair shell features 360-degree seating which allows kids to find their favorite sit. This chair also allows for flex through the robust frame design.

New for 2023

Numbers™ High Range Desk & Stool

Numbers Desk and Stool were created to address a conceptual need that emerged from early design charrettes: a value driven affordable K-12 desk and stool meeting specifications all over the world, providing unparalleled performance and visual subtlety. High Range desks paired with stools allow classrooms to be tiered providing dynamic seating that helps limit distractions.

Learning Spaces:

Trends we see in education.

Our singular focus on furniture allows us to stay on top of emerging trends for new and unique spaces. As curriculum and technology evolve, we quickly adapt with furniture that fills real needs and meets the demands of modern learning. From esports studios to outdoor environments, one thing remains true: creativity and flexibility are at the forefront of design.

Esports

Video games have grown up out of the basement. Today, the esports industry is pacing a new generation of inspired students and is creating more opportunities to students at all levels.

VR Labs

Virtual reality remains at the cutting edge of learning and educational opportunities. A dedicated VR space can quickly transport students to far away worlds and unique learning experiences.

Informal Spaces

Hallways are no longer just for walking. Those overlooked school spaces could provide the perfect setting for personal study, small group collaboration or even larger group meetings.

Makerspaces

Some call it this. Some call it STEM or STEAM. Either way, it's an incubator for problem solving, creativity and collaboration. It must remain a highly versatile hotbed of engaging zoned spaces, materials and tools.

Tech Spaces

In today's computer labs, students need spaces to work both individually and collaboratively. The furniture selected needs to adapt to both situations.

Learning Commons

A successful learning commons is a subtly energizing environment where students can engage in a diverse array of learning activities. It's a place where kids migrate to between class and after school – it's a place where kids want to be.

Art Classrooms

The design and science of art furniture. When it comes to art classroom furniture, a couple of key characteristics are common to both. As expected, strength and durability come first. But today, the need to connect computers to power and wifi is gaining importance in art studios.

Esports: Merging Passion with Learning

The meteoric rise in high school esports shows it's much more than child's play. Esports has blossomed into a hot topic of conversation for its legitimate learning, spanning from K-12 to higher ed.

Gladly We Game

The image shows a spacious, modern esports lounge. The walls are a vibrant blue, and the floor is covered in a grey and white geometric patterned carpet. In the foreground, there are several blue and white armchairs arranged around small, round, light-colored tables. One table has a laptop on it. In the background, there are long white tables with multiple computer monitors and keyboards, ready for gaming. A large screen on the right wall displays a colorful game. The overall atmosphere is clean, bright, and tech-oriented.

VR Labs:

Creating New Realities for Real-World Applications

Imagine a student so viscerally immersed in learning that it's dizzying. That's the power of using virtual reality in the classroom, and it's capturing the attention of K–12 educators.

In the past few years, more schools have begun using immersive technology to bring classroom curricula to life. From one classroom, any student can be transported to the Pyramids of Giza or to holding a virtual human heart. There's great potential for these simulated experiences to transform the delivery of educational content, improve learning outcomes and democratize learning itself.

Informal Spaces: Breathing Life Into Overlooked Areas

A generation ago, school hallways were loud, cavernous corridors for corralling students. Today, those hallways have become valuable informal learning spots, reinforcing that learning can happen everywhere — even in the most unlikely places.

They have a lot of monikers, like in-between or pass-through areas, informal work zones, open learning spaces (outside too), lounges, niches, nooks and nests — you name it. But the purpose of informal learning spaces is similar. They are non-discipline-specific spots for self-directed student learning, working and socializing.

Makerspaces: Cool Labs for Hands-On Creating

Every student has maker potential. An educator's role is to manifest the maker mindset. That requires creating irresistible school makerspaces — incubators that get students excited to collaborate, think, tinker, design and build tangible products that solve real-world problems. Failure is expected, and welcomed. However, it takes creative thinking to make these DIY spaces. The best ones are a buzzy blend of science lab, woodshop, computer lab and art room that support project-based learning pedagogy.

Tech Spaces:

Delineate Collaborative and Individual Learning Zones

Students are more tech-savvy than ever. Technology is practically in their DNA. Likewise, tech labs and computer labs must be ready to accommodate everything from beginning coding to high-level robotic competitions. We make the lab furniture to handle that spectrum.

Learning Commons: Transforming Open Space

Successful learning commons are a subtly energizing environment where students can engage in a diverse array of learning activities. It's a place where kids migrate to between class and after school – it's a place where kids want to be. Individual study and research, group research and exchanges of ideas and information – all of these diverse actions can take place simultaneously in the learning commons.

Art Classrooms: The Design and Science of Art Furniture

When it comes to art classroom furniture, a couple of key characteristics are common to both. As expected, strength and durability come first. But today, the need to connect computers to power and wifi is gaining importance in art studios. Not surprisingly, learning environments for these spaces are enhanced with exposure to the outdoors.

Seating

Seating is as unique as a fingerprint. Students sit in thousands of different positions — upright, slouched, twisted and tilted. They stretch out their legs, sit on them, cross them and bounce them. They will balance on their chair or teeter on the back, tempting gravity — and common sense.

Built for Learning.

* This product shown here is only available for import from NA.

* This product shown here is only available for import from NA.

Seating

Learning has evolved. Seating has adapted.

Like all of our furniture, our seating concepts were developed for PreK-12 students. From their very specific size ranges to their innovative contours — these seating options are ready for learning in any environment or situation.

Numbers™

An exceptional K-12 furniture solution that meets global requirements. Numbers offers a value driven, affordable chair, providing unparalleled performance and visual subtlety.

Flavors®

Offers increased movement and four seating positions. Its seatback flexes front to back and torsionally, allowing students to shift and move without chair resistance.

Oodle®

A revolutionary active seating line that puts the fun in classroom functionality. Featuring a unique movement disc base that allows for 10 degrees of movement.

Flowform®

Our Flowform line features deliberate organic shapes with soft radii and rounded edging. They work individually or loosely slide together, giving students endless options to make micro-adjustments.

Which ergonomics matter most?

Here are some ways administrators can get the most ergonomic bang for their buck.

Right Fit/Adjustable.

- Both seating and desks need to be properly scaled to fit the size of the individual student.
- We offer a wide range of heights in seating — typically four or five per product line. Our desking lines are adjustable in height as well.

Right Size.

- Properly sized classroom seating supports healthy posture and decreases fidgeting.
- Students should be able to sit with their feet firmly planted on the floor and their backs against their chairs.

Function.

- 21st century learning often requires seating to be moved throughout the day, so chairs must be light enough, or fitted with casters, to allow students of all ages to move them quickly and easily.

Seating that Doesn't Fight the Student.

- A chair that allows some movement on the part of the student can promote learning. But how much movement?
- Consider our Graduated Movement Concept, an idea educators can use to tailor the ergonomics of the classroom furniture to support the curriculum. Though subtle differences in design, our Groove, Flavors and Numbers lines allow moderate movement while Oodle, Flavors & Groove Noodle, and Theorem permit the utmost movement.

Size Guide

Calculated for success.

Calculated for universal appeal.

Numbers chair provides a value-driven, high-quality solution for K–12 classrooms around the world. That freed us to design the chair’s front entirely separate from its back, with variable thickness and a fully integrated frame. And, it’s our first product line to meet international BIFMA EN and GB requirements for size, safety conformance and durability.

1-2-3 global markets.

We designed Numbers with a winning formula that meets classroom furniture standards of three major world markets–EMEA (Europe, the Middle East and Africa), Asia-Pacific and the Americas.

Comfortable blow-molded shell

Blow-molding let us add shell volume, then nestle the frame in the seatpan. A molded undershell provides added strength, especially for sitters who favor leaning back. The integrated aesthetic is easier to clean, too. With no vent holes on the top of the seat pan, you don’t have to worry about any soiling or mold formation inside the chair shell.

Stack Chair

Mobile Stack Chair

Freedom of movement.

Flavors seating eliminates as many restrictions to student movement as possible.

- A relatively flat seatpan with a waterfall front allows the student to comfortably face front, back and either side.

Less restricting to the shoulders and spine.

To further enable the student to work with students on either side, the seatback provides torsional flex — allowing the student to gently twist to face left or right.

Move, breathe and concentrate.

A subtle front-to-back flex allows the student to move and adjust their posture, which promotes better concentration.

For classrooms that move and students of all sizes.

- Flavors seating is light enough for most students to move in the classroom without a problem.
- Achieve additional mobility with casters on the Adjustable Chair, Stools and Mobile Stacking Chair.
- Stacking models come in six sizes, so you can pair the appropriately sized chair with the student.

Construction. Built for the demands of a school environment.

- The durable, high-density polypropylene shell stands up to the challenges of a real-world classroom.
- Made of 18-gauge welded steel, the frame is protected with chrome plating or a rugged powder coat finish.
- For added comfort, the shell rests directly on the frame (not on the rivets).

Model 11847 14"(356mm) seat height, 'B' Shell. Shown in Apple.	Model 11848 16"(406mm) seat height, 'B' Shell. Shown in Blueberry.	Model 11849 18"(457mm) seat height, 'A' Shell. Shown in Black. Note :
* The **smaller three sizes** are not localized in APAC, available to order from US.

Flavors Stack Chair

Four-position chair allows student to sit comfortably facing front, either side or rear. Flexing seatback provides support and allows student to turn with less restriction. Flat seatpan with waterfall front edge. Three sizes. Available in 4 colors.

- The shell rests on the frame, not rivets to add comfort.
- High-density polypropylene with color throughout the shell.
- Durable swivel-base glides, with non-staining nylon bases and chrome-plated steel covers come standard.
- Choose optional steel or felt glides.
- The legs are strong, 18-gauge welded steel with a durable chrome finish.
- Chrome legs with durable chrome finish or Platinum powder coat finish.
- Stacks four chairs high.

Flavors Mobile Stack Chair

Four-position chair allows student to sit comfortably facing front, either side or rear. Flexing seatback provides support and allows student to turn with less restriction. Flat seatpan with waterfall front edge. Available in 4 colors.

- The shell rests on the frame, not rivets, to add comfort.
- High-density polypropylene with color throughout the shell.
- The legs are strong, 18-gauge welded steel.
- Chrome legs with durable chrome finish or Platinum powder coat finish.
- Mobile chairs recommended for use on carpeted flooring.

Stack

Mix

Move

Meet Oodle.

Often our pursuit of designs that inspire the minds of students takes us to places we never would have imagined even five or 10 years ago. One such result is here. Meet Oodle, the all-new active seating line that is as fun to explore as it is to say.

Switch it up.

Keep your space fresh by switching things up in a flash. You're never stuck with one height or one color. And the unique rocker base system maximizes versatility. Sit flat, or sit with movement, on the very same stool.

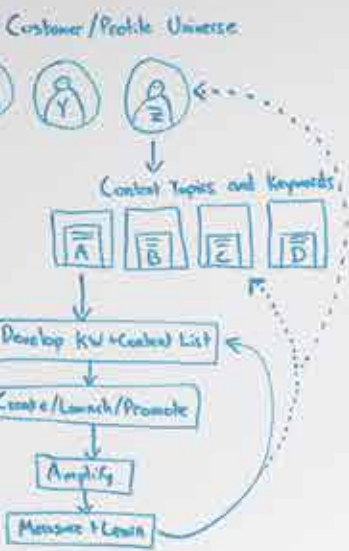

Moving up.

The colorful 6 1/2-inch (165mm) sections stack and twist to engage a unique stool-to-stool locking system. Educators can easily assist students to make the stool taller or shorter.

Holding up.

Oodle's 17-inch (432mm) diameter is perfect for all ages and sizes of student. Sturdy polypropylene material holds up to all elements.

Oodles of possibilities.

The unique base design incorporates a structural disc that when flipped 180 degrees provides the student with the ability to wiggle. Or, if the student or teacher chooses, sit flat. Model Oodle31 comes with three sections and one rocker base. Model Oodle33 comes with three sections and three rocker bases.

Oodle® Seating

Oodle Stools and Elemental 6-star table is available to order from US. Oodle stools shown in Apple, Charcoal and Platinum.

Mix, match and stack.

To stack, rearrange your colors or use Oodle in different configurations. Restacking is a breeze, just find the circular indicator and snap Oodle into place.

Choice of height.

Because Oodle comes in three 6 1/2-inch (165mm) sections sections, teachers don't have to be stuck with a single height stool in their classrooms and commons areas. And students are free to choose the height they feel most comfortable with for the activity at that moment. For example, four 19 1/2-inch (495mm) Oodles can be used as six 13 1/2-inch (343mm) Oodles in the morning, and twelve 7 1/2-inch (191mm) Oodles in the afternoon.

Height with Rocker Base Disengaged

Height with Rocker Base Engaged

Pair Oodles with matching tables from our Elemental® and Planner® Studio lines or match edge band colors from our Interchange® table line.

Oodle seating paired with Elemental Tables and Flavors Seating.

All students welcome.

Students come in all shapes and sizes. In the design of Oodle, we considered every body type. With 17 inches (432mm) of seating surface, larger students will feel just as welcome using an Oodle.

Seat diameter measures 17"(432mm) Ensuring every student feels comfortable, weight limit 250lbs.

Comfortable motion.

Featuring a modest 10 degrees of motion, Oodle's edge is designed to catch a student before he or she is able to lose their balance. And, of course, motion is optional on Oodle.

Oodle moves only so far before the built in 'stop' engages at 10° of rocking. This prevents the user from feeling unstable.

Something soft from Smith System.

Design forward.

Soft to the touch, Flowform seating adds a new level of comfort and flexibility to more spaces. Built for collaborative groups of all sizes or solo study, the Flowform line adds a softer feel without sacrificing durability or maneuverability.

Soften your space.

Flowform seating has a soft touch and ample cushion for lasting comfort in multiple positions. Underneath it all sits a reinforced frame for long-lasting strength.

Create and collaborate.

Easily rearrange Flowform seating in limitless configurations for collaboration of all shapes and sizes.

Built to last.

The highly durable, highly washable vinyl fabric suits classrooms of all ages and easily wipes down at the end of the day.

Flowform Soft Rocker

The Soft Rocker offers a new style of movement-based active seating. The rocking action promotes engaging interaction with others. Children, adolescents and even adults love the rocking motion of the Soft Rocker.

The Soft Rocker is constructed of durable, kiln-dried, solid hardwood with a poplar plywood frame, which is corner blocked at load-bearing connections. The back frame is webbed for structural integrity. The seating pad is made from high-density foam meeting FR CA117 standards and contains no added flame retardant chemicals.

- Designtex 100% vinyl fabric, phthalate free.
- 100,000 Wyzenbeek double rub (CD) rating.
- Polyester fabric backing.
- Easily cleanable with a 10:1 water:bleach mixture.

smithsystem.com/softrocker

Create a fresh space for flexible — and rockable — learning.

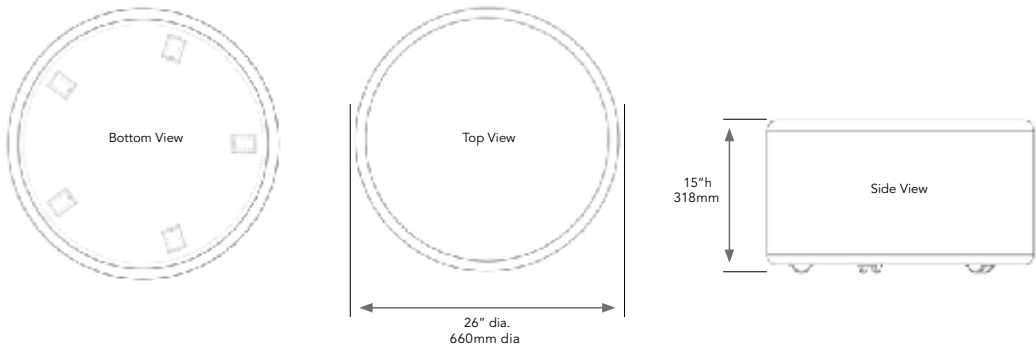

Flowform Ottoman

The 26" ottoman pairs well with our Soft Rocker or on its own to create comfortable work spaces for young adult learners. Collaborate with others and interact in a close-knit space. The ottoman is constructed of durable kiln-dried pine solid hardwood with a poplar plywood frame, which is corner blocked at load-bearing connections. The back frame is webbed for structural integrity. The seating pad is made from high-density foam meeting FR CA117 standards and contains no added flame retardant chemicals.

- Designtex 100% vinyl fabric, phthalate free.
- 100,000 Wyzenbeek double rub (CD) rating.
- Polyester fabric backing.
- Easily cleanable with a 10:1 water:bleach mixture.

Flowform Tapered Cylinder Stool

Flowform Soft Seating from Smith System helps create unique collaborative interaction spaces for kids of all ages. Flowform soft seating is available in 4 shapes, with 2 divider wall sizes to create barriers — when space is needed. The frame is constructed of durable 18mm birch plywood veneers, each piece interlocking with adjacent pieces to create sturdy load-bearing connections. Thermoplastic polyester fiber upholstery batting minimizes telegraphing of the framework through the vinyl exterior. The seating pad is made from flexible polyurethane foam, meeting FR CA117 standards, and contains no added flame-retardant chemicals.

- Designtex 100% vinyl fabric, phthalate free.
- 1,000,000 Wyzenbeek double rub (CD) rating.

Desks & Tables

Today's learning environments present an unprecedented challenge to desks and tables, demanding greater versatility and durability. Our desks and tables are designed for multiple reconfigurations — pods, pairs, rows and more — and are reinforced to withstand the constant movement.

Built for Learning.

Desks & Tables

Numbers™

To conserve space, the desks have a compact design. Their leg form, coupled with felt-bottom backpack hooks on all four legs, allow easy slide-on stacking — three or four desks at a time. The laminate top is 1.25 inches thick in North America; 25 mm for Europe and Asia.

Flowform®

This sleek, contemporary table designed for collaborative learning provides sleek looks, solid functionality and great flexibility. It can be arranged in countless ways for groups of all sizes. Its work surface provides ample space for work of all kinds.

Interchange®

The highly versatile Interchange line of contemporary classroom desks and tables features legs that easily adjust from 22 to 34 inches in height. Choose from many shapes, all of unbeatable engineering and beauty.

Elemental®

It's not all just colors and shapes on the Elemental line. Leg and caster options provide even more versatility. Elemental Tables come with three leg choices: Fixed-height with glide (EG), Fixed-height for caster (EC), or Adjustable-height (EA). Each leg style is available in 5 contemporary colors.

Silhouette®

The Silhouette desk is a contemporary, economic solution for traditional and collaborative classrooms. Its durable cantilevered design, adjustable legs, and optional storage accessories make it a timeless favorite. Single and two-student options available.

Planner®

Every student deserves an unshakable foundation for learning. Planner desks and tables deliver via a heavy-duty, steel frame and leg system. This line is suited to a variety of subjects, including art, maker labs, STEM learning, and more.

Beyond design, consider how it's engineered and built.

Right Size

Fitting the chair and desk or table to the student is important, as a proper fit helps academic performance while a poor fit hinders it.

 **27in.** Suggested minimum workspace

Healthy Construction

Smith System desks and tables are made for healthy learning environments, and are UL GREENGUARD Gold Certified with the exception of butcher block.

Suggested Desk and Chair Heights:

Table Height	~19"	~22"	~24"	~27"	~29"
Chair Seat Height	10"	12"	14"	16"	18"
3–4 year olds	50%	50%			
Kindergarten		50%	50%		
Grade 1			100%		
Grade 2			25%	75%	
Grade 3–4				100%	
Grade 5				50%	50%
Grade 6–12					100%

Dependability

Smith System backs its tables and desks with a lifetime warranty on the frame and legs and a 12-year warranty on table tops and desk tops.

Availability

Smith System employs lean manufacturing techniques, allowing us to make tables and desks to order and ship them.

A new benchmark in comfort, strength, design.

The perfect pairing.

To complete the Numbers equation, we designed its companion: the versatile Numbers Desk. Together, the chair and desk set equals a smart solution for students, teachers and facility personnel.

Adjustable height & casters.

These desks can quickly be adjusted in height and have discreet set screws which are inside the legs allowing for smooth legs. Standard inserts range from 24.5 to 30 inches; low-range inserts are 19 to 24.5 inches. The High Range Desk Table adjusts from 27" - 42" in 17.5 mm increments. In addition, the inner leg tube can flip between glides or casters (sold separately), which allows for wheelbarrowing without affecting desk height.

Slide-on stacking.

To conserve space, the desks have a compact design. Their leg form, coupled with felt-bottomed backpack hooks on all four legs, allows easy slide-on stacking — three or four desks at a time. The laminate top is 1.25 inches thick in North America; 25 mm for Europe and Asia.

Flowform Tables

This compact, contemporary table designed for collaborative learning provides sleek looks, solid functionality and great flexibility. It can be arranged in countless ways for groups of all sizes. Its work surface provides ample space for work of all kinds. Features angled triangular shaped leg and organic shaped tops. The curvature works well with the Flowform Soft Seating and Mobile Storage. Order them in 9 laminates with matching 2mm edge banding, Silver frame only.

- Durable 3/4”(19mm) thick desktop, with a low-pressure laminate surface.
- Rugged powder-coat surface on legs resists wear.
- Option of casters or glides.

Contemporary looks, over and over again.

Interchange® Desks & Tables

Unique surfaces to
create an unlimited
number of possibilities.

Interchange® Desks & Tables

Contemporary styling, solid functionality and innovative desktop designs.

For 21st century classrooms.

Its unique combination of functionality, style and practicality gives the Interchange line its innate unity and beauty.

- Interchange Wing, Diamond and 3-2-1® Desks for collaborative learning (and traditional) classrooms.
- Interchange Student Desks for traditional classrooms.

Dependability.

Lifetime warranty on the frame and legs, 12-year warranty on table and desktops.

Healthy construction.

SCS Indoor Air Advantage™ Certified.

Unbeatable construction.

- The T-Mold edge band, used on Interchange Desks and Tables, is stapled every 6”(152mm) to provide superior fastening power.
- The work surfaces are high-pressure laminate that stand up to heavy use.
- Structural Framing — steel reinforcing beams attached to each leg — adding rigidity and preventing wobbly legs. Don’t settle for Easy On Brackets for tables and desks in collaborative learning classrooms.

Shown in White Oak top with Cerulean edge and Platinum frame.

Interchange Wing Desk

This compact, contemporary desk designed for collaborative learning provides sleek looks, solid functionality and great flexibility. It can be arranged in countless ways for groups of all sizes. Its work surface provides ample space for work of all kinds. APAC has 4 laminate colors + 5 edgeband colors + 1 frame color but may add more in the future.

- Durable desktop available in 1 1/4”(32mm) or 3/4”(19mm) thickness, with a high-pressure laminate surface.
- Rugged powder coat surface on legs resists wear.
- Chrome-plated lower legs of 16-gauge steel resist scuffing.
- Sock-style glide caps add protection.
- 1”(25mm) adjustable leveling glides provide stability on uneven floors.
- Backpack hook is standard, attached to the structural framing of the Wing Desk.

Diamond Wing Desk Model SS03095 available with optional Cascade® standard width tote.

Make it mobile with casters
Order Model 17576

Mix Wing & Swoop Wing Desks

Interchange Swoop Wing Desk

This compact, contemporary desk designed for collaborative learning provides sleek looks, solid functionality and great flexibility. It can be arranged in countless ways for groups of all sizes. The swoop in the work surface provides a sense of place for the student.

Interchange® Wing Desk

Wing Desks shown at 34"(864mm)h with 24"(610mm)h Flavors Fixed height Stools, Model 11889. Shown in Asian Night top with Apple edge and Platinum frame.

All Interchange Desks can be set at 34"(864mm)h on a glide or 37"(940mm)h on casters for use with a 24"(610mm)h stool or standing.

The unique shape of Interchange Wing Desks allows you to oppose desks in a compact area, or in rows for lectures, testing or individual work.

Shown in Classic Linen top with Persian Blue edge and Platinum frame. Shown with optional Flavors Stack Chair, Model 11849.

Interchange® Desks

Interchange Wing Open Front Desk
Model SS04503
23.5" x 41" x 22" - 32" (597mm x 1041mm x 559mm - 813mm)

Shown in White Oak top with Cerulean edge and Platinum frame.

Interchange Wing Open Front Desk

This flexible contemporary desk provides both sleek looks and solid functionality. Its space-saving desktop provides ample work space and allows it to create compact groups of four. It offers the convenience of a built-in Bookbox.

- Interchange Open Front Desks are made with your choice of bumper edge tops.
- Edge moldings resist wear, choices available (see chart, below).
- Rugged powder coat surface on legs resists wear.
- Chrome-plated lower legs of 16-gauge steel resist scuffing.
- Sock-style glide caps add protection.
- 1" (25mm) adjustable leveling glides provide stability on uneven floors.

Shown in Classic Linen top with Apple, Cerulean, Platinum & Charcoal edges with Platinum frames. Shown with optional Oodle® stools, **Models OODLE31 CER, OODLE31 CGR & OODLE31 APL**

Optimize classroom space with Interchange Wing Desks.

Interchange Wing Desks allow great flexibility when it comes to creating compact pods of two, three and four students. The flexibility comes from the shape of the desktop. Its pie shape allows four students to work in a very compact area. Three students, even smaller. Two students can work almost side-by-side, facing or at an angle — whichever suits their activity.

Interchange® Desks

Six Interchange Diamond Desks form a compact group with ample space to work. Shown with optional Apple Casters, 17577.

Put two Interchange Diamond Desks together and students can work in a pair.

Three Interchange Diamond Desks approximate a semi-circle for three students.

Interchange Diamond Desks

This contemporary desk designed for collaborative learning classrooms provides sleek looks and solid functionality. It can be arranged in compact groups of up to six. Its large work surface provides ample space for projects and work of all kinds.

- Durable desktop available in 1 1/4"(32mm) or 3/4"(19mm) thickness, with a high-pressure laminate surface.
- Edge moldings resist wear, choices available (see chart).
- Rugged powder coat surface on legs resists wear.
- 1"(25mm) adjustable leveling glides provide stability on uneven floors.
- Adjustable desk height, adjusts in 1"(25mm) increments. Only three (not four) legs to adjust on Single-Student Diamond Desk.

Crucial for desks in collaborative learning classrooms, Structural Framing provides a stronger work surface and prevents legs from wobbling.

Studio Tables

Stable foundation.

What sets Planner desks and tables apart is their rock-solid bases.

- Steel legs, one at each corner, welded to two steel cross members at each corner.
- Heavy gauge steel modesty panel bolted to each leg across the front.

Unbeatable construction.

- T-Mold edge bands on Planner desks and tables are stapled every 6 inches (152mm) to provide superior fastening power.
- The work surfaces are high-pressure laminate that stand up to heavy use.

For collaborative learning or traditional classrooms.

- Huddle desks provide tremendous durability in collaborative learning classrooms.
- Planner student desks offer the same strengths in traditional classrooms.

Healthy construction.

- SCS Indoor Air Advantage™ Certified.

Offering flexibility, functionality and mobility.

- Planner student desks are available in a variety of sizes including two- and three-student models.
- Huddle desks are available in three sizes.
- Built-in backpack pegs keep classrooms tidy.
- Steel Bookboxes and caster sets available.

Planner activity tables' versatility is a strength.

- Work surfaces available in Trapezoid, Square, Round, Half-Moon and Contour shapes.
- Trespa® TopLab® Plus surfaces available for labs and art rooms.
- Modesty panels available.

Dependability.

- Lifetime warranty on the frame and legs, 12-year warranty on table and desktops.

Planner® Studio Tables

Planner Studio Tables — 36"(914mm) Deep

These tables are designed to meet the needs of today's creative learning spaces. These sophisticated 29"(737mm) h, 36"(914mm) h, 40"(1016mm) h tables meet the demanding needs of your Makerspace, without the pared down "shop-class" aesthetics.

The adaptive urban industrial style allows for crossover application in media centers, active learning spaces, common areas or any space that encourages collaboration and social learning.

- Strong, 14-gauge steel legs are protected with a durable powder coat surface.
- 3mm flat edges.
- 3 top colors and 5 leg color choices. 30"(762mm) D Platinum leg only.
- Sturdy 1 1/4"(32mm) desktop with a high-pressure laminate surface.
- Optional second surface shelf kits available on stand-up models 36" & 40"(914mm & 1016mm), in Grey only.
- Optional foot rest available for 36"(914mm) height Studio tables, Platinum finish only.
- Planner Studio comes standard with 4"(102mm) diameter casters, with all 4 wheels lockable.

Tables that meet the demanding needs of today's creative learning spaces.

36"d x 60"w (914mm d x 1524mm w)
Planner Studio, Model SMPLN25210
40"(1016mm) h, Shown in Trespa Black top with Platinum legs.

Planner Studio Tables — 36"(914mm) Deep Trespa®

The Planner Studio table with Trespa TopLab top is designed to meet the needs of demanding creative and science learning spaces. The ½"(6mm) thick work surface consists of Trespa TopLab® PLUS material, which is resistant to a large number of aggressive chemicals as identified by SEFA (Scientific Equipment and Furniture Association) and PSI (Professional Services Industries), if cleaned within 24 hours.

- Strong, 14-gauge steel legs are protected with a durable powder coat surface.
- Trespa Planner Studio is available in 36x60" (914mm x 1524mm) size only.

edge and Platinum legs. With Charcoal casters.

Storage

Imagine a classroom where four or five groups of six students are working on projects. The teacher circulates about, providing information, direction and encouragement. To allow for all this activity, materials and resources must be organized and readily available to students. Independent access to resources for students frees the teacher to direct and instruct as needed. That's the idea behind Cascade.

Built for Learning.

Storage that holds your attention, too.

Model 57AAA00000
Straight Unit w/shelves
and no back panel.

Model 57BBAC18000
Curved Unit w/totes,
shelves and back panel.

Model 57BBAC18000
Curved Units w/totes, shelves
and back panels, three shown.

Whiteboard Back available.
Choose model with back panel. The
optional magnetic whiteboard back
panel is not needed to increase
rigidity. When no back panel is
installed, the unit has a pass-through
design for access from both sides.

Flowform Curved Storage

Flowform Storage adapts to nearly any environment, the sides blend to create a versatile storage system. Available in 3 laminate choices, with matching 3mm-edge end panels finished in wrapped vinyl in choice of 5 colors — plastic handles match the vinyl colors. The end panels are a 16-gauge steel interior shell, wrapped in a cushioned vinyl exterior. The tubular steel sub-frame is constructed of 14-gauge steel, which supplies the unit solid construction. The end panels are capped off with a plastic handle that is color matched to the vinyl of your choosing.
